THE BRAIN BENEFITS OF BEING A SPORTS FAN

Scientists have conducted many studies that examine how being an avid sports fan changes a person. Some of the most interesting research shows that for both young and old alike, identifying strongly with a sports team can be good for social well-being. These studies show that feeling a strong connection to a team—going to games, keeping track of players and statistics, and so on—can make people less lonely and feel greater social self-esteem. So take yourself out to the ball game. It may actually be good for you!

HOW SHINY THINGS GET THEIR GLOW

Found in floor polish, car polish, shoe polish, and cosmetics, carnauba wax is used to give a glossy shine to many things you put in your mouth, such as chewing gum, candies, gravies and sauces. It is also commonly used on pharmaceuticals as a coating on tablets to aid swallowing. The shiny coating on jellybeans is made from shellac, also known as confectioner's glaze. It's made from a resin excreted by the female lac beetle, indigenous to India and Thailand. Apples sold in grocery stores are washed for sanitary reasons and then sprayed with a fine mist of shellac to restore outer skin protection.

Movies At the Riverfront Community Center

Please note that we receive many recommendations on what type of movies we should and should not show at the center, and as a result have concluded that no two seniors are alike... Some folks want to see only comedies or romantic films. Others want the latest thrillers with lots of action. Because we offer a variety of films, there will be times when a film might not meet an individual's personal preference. Going forward, we will always show you the rating of the film, highlighting its content so that there will be a clear warning that the film may contain sexual content, violence, rough language etc.. Then the choice is yours!
