

Connecticut – Estimated Times of Restoration by Town As of October 31, 2017, 8:00 p.m.

Estimated Times of Restoration reflect the day and time when Eversource will complete restoration for the vast majority of our customers, although small or individual outages may still remain.

Substantially complete means that we have restored power to the majority of customers and less than 1 percent of the community remains without power, including individual customers where additional on-site work is required. The safe restoration of all customers is our priority. Customers without power in communities where you neighbors have power are asked to report your outage online at Eversource.com or call our Customer Service Team at 800-286-2000 to report your outage.
