INSTALLER FALSE ALARM PREVENTION PROGRAM CHECKLIST

Yes  No

1. If a duress feature was installed, I thoroughly explained it and I did not program the system so that the duress code is only one digit different than the normal code.

2. I checked that the control panel has been programmed so that:
   a. it will not transmit more than one (1) alarm signal from the same zone until manually restored at the premises;
   b. it will delay at least fifteen seconds before initiating dialing on intrusion alarm signals;
   c. it has adequate delay time on entry/exit doors (delay of 45 seconds or more is recommended); and
   d. a cancel code can be entered by the customer to cancel accidental alarms.

3. I checked that police and fire panic buttons cause a siren or speaker to sound and that medical panic buttons cause an audible signal.

4. I checked that the Arming Station(s) emit sound to inform occupants when an entry/exit door sensor has been triggered.

5. I installed and tested standby/backup power.

6. I reviewed the "Customer False Alarm Prevention Checklist" with the customer.

7. I determined whether the customer had special telephone features, such as call waiting or DSL, and took appropriate steps to allow proper control panel dialing and monitoring center verification. (Such as *70 for call waiting, etc.)

8. I checked the control panel was properly grounded to the manufacturer's specifications.

9. I checked that all door and window contacts were properly selected, installed and tested. I considered loose fitting doors and windows, whether wide gap contacts were needed, and steel doors and windows. I followed the manufacturer's installation instructions.

10. I checked all glass breakage sensors were properly selected, installed and tested. I gave consideration to pets, on-site noises and the general environment. I followed the manufacturer’s installation instructions.

11. All motion type detectors were properly selected, properly installed and tested. I gave consideration to pets, sunlight, other heat sources, and harsh environments. I followed the manufacturer’s installation instructions.

Please explain if you answered “No” to any of the above items:
